

Q-CashExterior™ 35

Q-CashExterior 35, a compact multi function ATM, designed especially for limited floor space and high capacity and performance. An optimised solution combining services of cash dispense, deposits, passbook and document printing, automatic bar code scanning for bill payment and marketing with full motion video based on industry standard browser technology.

- Recessed keyboard and card reader for maximum customer privacy
- Maximum capacity and functional mix on minimum floor-space
- Optimised customer interface with large screen
- EMV certified
- Full industry standard software support

Q-CashExterior 35

Q-CashExterior 35 is based on a modular and flexible concept with all modules in one compartment. This makes Q-CashExterior 35 the most compact Multi Function ATM available in the market and this is including a large screen for advertising and video clip together with up to 5 cassettes support for notes and media. Q-CashExterior 35 is specially designed to ensure highest degree of customer security, privacy and comfort in operation. The customer keyboard and the card reader are recessed in the customer fascia giving the user full control during the whole transaction.

ENVELOPE DEPOSIT

The optional Depository Unit allows customers to make envelope deposits. An empty envelope is presented to the customer via the same slot in the fascia where it later can be deposited. A filled envelope is accepted, printed, stacked and stored in a removable and lockable cassette.

DISPENSING VERSATILITY

Q-CashExterior 35 operates with a state-of-the-art

friction feed dispenser technology. Up to 5 denominations with a cassette capacity of up to 15,000 notes is supported in a mixture of new and used notes as well as other media. Self-calibrating sensors and double detect reduces preventive maintenance to a minimum.

PASSBOOK PROCESSING

BANQIT Q-Coput 80, integrated in the top compartment, performs the passbook update transactions fast and smoothly. Q-Coput 80 supports passbooks of various sizes in the same device. Magnetic stripe as well as bar code can identify passbooks and account numbers. Automatic forward and backward page turning as well as book retract is an option.

BAR CODE READING

The utilisation of an optional integrated barcode reader enables self service bill payments to be carried out. Providing a visible line for bi-directional scanning ensures customer ease of operation.

SYSTEM	FEATURES
NOTE & MEDIA DISPENSER	1-5 cassette, in 12 mm safe, 1-4 cassettes in CEN IV safe. Polycarbonate multimedia cassette with 350 mm capacity. Single note reject and bundle retract into separate compartments. Up to 100 notes in a bundle presentation. Friction technology.
